

GCE CERT

Course Certificate

It is hereby confirmed that a post-graduation 4 week specialization course in

Green and Circular Economy - Dynamics and Governance

September 28 2020 – July 2 2021

organized by the Department of Geosciences and Natural Resource Management,
University of Copenhagen and financed by the Danida Fellowship Centre has
successfully been completed by

Mr Elias Odula Barasa

The overall objective of this course is for the participants to acquire insights, theoretical
frameworks and applicable tools into the green and circular economy agendas and their
evolution over time.

Special focus has been on:

- Core theoretical concepts related to the green and circular economy
- Core Danish and EU environmental and industrial green and circular policies,
governance practices at national/local levels compared to home country
- Cases, trends and dynamics in the greening of firms and industries and their
competitive implications
- Dynamics, advances and challenges of circular innovations
- Regional and urban circular development, including industrial symbiosis and eco-
industrial parks and circular cities
- The green business model framework as a strategy tool
- Multiple exposure to cases of innovative green and circular solutions, including
the Danish Return System and Danish recycling stations.
- Suggested action plan to self-defined problems in the home country
