CAREER PROFILE SUMMARY

I am a highly experienced and results-driven ICT professional with extensive expertise in cross-functional IT methodologies and technical solutions. I have a proven track record of leading ICT teams in designing, developing, and configuring network infrastructure, managing network servers and technology tools, and ensuring optimal system performance. Skilled in setting up accounts and workstations, monitoring IT operations, and maintaining systems in alignment with business requirements, I am committed to leveraging my robust technical expertise to drive business value, enhance operational efficiency, and contribute to organizational growth through strategic IT leadership.

EDUCATION BACKGROUND

- **Master of Science in Information Systems Management;** KCA University 2022 to date
- **Bachelor of Science in Mathematics and Computer Science;** Multimedia University of Kenya; 2012 to 2015
- **Kenya Certificate of Secondary Education:** Ngoto Boys High School; 2007 to 2010.

KEY SKILLS AND COMPETENCIES ACQUIRED

- **Systems Administration:** Successfully configured user accounts and provided access where necessary and responded to and coordinated the resolution of user technical requests.
- **Service Desk Administration:** Acquired experience handling Server administration, resolving all desktop-related issues, and maintaining the Company IT Networks, servers, and security systems.
- **IT Technical Support:** Expert in monitoring and maintaining the computer systems and networks of an organization through installation and configuration of computer systems.
- **Network Security:** Efficient with all processes involved in protecting the usability and integrity of your network and data.
- **Cyber Security:** Ability to solve any system vulnerabilities a system may have by ensuring that a system is secure, stable, and prepared to fight off any security attack. Well adept with staying up-to-date with security updates e.g. Anti-viruses.
- **Troubleshooting and Maintenance:** Proficient at maintaining computer network infrastructure to ensure optimal uptime and best service and enforce an up-to-date systems backup.
- **Technical Expertise:** Experienced in providing technical expertise for IT network design, implementation, optimization and upgrade.
- **Flexibility:** Ability to work in a busy and challenging environment by maintaining calm under pressure and ensuring that I think through any possible threats that can occur in systems and plan for them before they happen.
- **Problem Solving Skills:** I can visualize and solve complicated problems in the best way and make accurate and informed decisions.
- **Communications Skills:** Ability to engage with people from all backgrounds and create some professional relationships.
- **Organization Skills:** Well-versed in identifying and prioritizing activities and assignments, making necessary adjustments as required, foreseeing risks, and mitigating them.
