From the above experience, I have gained a range of skills necessary for research and training management which include research proposal development, research grant application, data collection, quantitative and qualitative data analysis, team playing, negotiation, partnerships collaboration, research reporting and writing, good communication, presentation and adherence to research ethics and integrity. From the responsibilities, I have successfully managed a team of above 100 staff to raise the revenue of forest enterprises by 15% in Three years, have won research grants and awards in collaboration with colleagues, have mobilized stakeholders to engage in academic discourses and have won competitive scholarships abroad to pursue master's and PhD in Europe.

With the above knowledge, skills and competencies, I believe I am most suited for this position if granted the opportunity to serve. Your kind consideration and support in the above position will be an opportunity to add more value to the school.
