

Mentorship Report

Personal Information

- **Trainee Name:** Denis Kiplagat
 - **Institution:** Kenya School of Government
 - **Mentor:** Mr. Aggrey Busolo
 - **Mentor's Email:** aggrey.busolo@ksg.ac.ke
 - **Mentorship Duration:** 29th February 2024 to 28th January 2025
-

Introduction

During my one-year internship at the Kenya School of Government, I had the privilege of working closely with my mentor, Mr. Aggrey Busolo, in various aspects of the IT field. The mentorship has been an invaluable experience that significantly advanced my skills and knowledge as a Software Engineer, particularly in full-stack development.

Over the course of the year, I had six formal mentorship meetings with Mr. Aggrey, spread across the mentorship period. These meetings were pivotal in my personal and professional development, and the lessons learned have shaped the direction of my career. Below is a detailed breakdown of the skills and knowledge I gained during my mentorship.

Summary of Mentorship Meetings

1. **Meeting 1: 29th February 2024**
 - **Focus:** Introduction to Customer Support Activities and Data Protection
 - **Key Takeaways:**
 - I was introduced to the concept of customer support in IT, including how to effectively assist users, troubleshoot technical issues, and maintain positive relationships with clients.
 - We discussed **data protection** in IT systems, including encryption techniques and best practices for securing user data, as well as the legal frameworks surrounding data privacy.
2. **Meeting 2: 15th April 2024**
 - **Focus:** Problem Solving in IT and Systems Maintenance
 - **Key Takeaways:**
 - Mr. Aggrey guided me through the problem-solving process, which helped me refine my skills in troubleshooting and resolving common IT issues.
 - We also covered **system maintenance**, focusing on the importance of regularly updating systems, applying patches, and troubleshooting common software and hardware issues to ensure optimal system performance.
3. **Meeting 3: 3rd June 2024**
 - **Focus:** Cloud Computing
 - **Key Takeaways:**

- Mr. Aggrey provided an in-depth understanding of **cloud computing**, covering the different types of cloud services (IaaS, PaaS, SaaS) and cloud platforms such as AWS, Microsoft Azure, and Google Cloud.
 - We explored how cloud computing transforms the IT landscape by offering scalable, cost-effective, and reliable solutions.
4. **Meeting 4: 20th July 2024**
- **Focus:** Full-Stack Development and Software Engineering Principles
 - **Key Takeaways:**
 - We discussed **full-stack development**, which involved understanding both front-end and back-end aspects of software development. I learned about various programming languages and frameworks used for building web applications and integrating both ends of a system.
 - We also covered **software engineering principles**, such as version control using Git, writing clean and maintainable code, and the importance of testing and documentation.
5. **Meeting 5: 12th September 2024**
- **Focus:** System Maintenance and Customer Support Best Practices
 - **Key Takeaways:**
 - I gained hands-on experience in **system maintenance**, learning how to maintain IT infrastructure, perform regular checks, and solve real-time issues.
 - We revisited customer support techniques, focusing on effective communication with users and how to resolve technical issues quickly and professionally.
6. **Meeting 6: 15th December 2024**
- **Focus:** Advanced Cloud Computing and Software Engineering Techniques
 - **Key Takeaways:**
 - We explored advanced topics in **cloud computing**, such as containerization (Docker) and orchestration (Kubernetes). These technologies are essential in modern software development for deploying scalable applications.
 - Mr. Aggrey also shared insights on **software architecture** and designing scalable, secure, and maintainable applications, which are critical for building robust systems.
-

Key Learning Outcomes

Throughout my mentorship, Mr. Aggrey provided invaluable guidance that expanded my knowledge and skills in the following areas:

1. **Customer Support Activities:**
I gained an understanding of customer support within IT, focusing on efficient problem resolution, client communication, and maintaining user satisfaction.
2. **Data Protection in IT Systems:**
I learned various data protection techniques, including encryption methods, secure storage practices, and relevant privacy regulations that are important for safeguarding user information.

3. **Problem Solving in IT:**

I honed my problem-solving abilities, learning how to approach and resolve IT issues in a systematic manner. This has made me more confident in troubleshooting and finding effective solutions.

4. **System Maintenance:**

I became proficient in maintaining and troubleshooting systems. This includes applying updates, ensuring uptime, and handling common IT issues to keep systems running smoothly.

5. **Cloud Computing:**

I developed a solid foundation in cloud computing technologies, learning how to leverage cloud platforms to build scalable applications, manage infrastructure, and implement cost-effective solutions.

6. **Software Engineering and Full-Stack Development:**

I gained practical experience in full-stack development, from front-end design to back-end integration. Additionally, I learned about best practices in coding, version control, and testing to create high-quality software.

Conclusion

The mentorship I received from Mr. Aggrey Busolo has been incredibly impactful in my development as an IT professional. His guidance, combined with the hands-on experience I gained throughout the mentorship, has strengthened my technical and problem-solving abilities, especially in full-stack software development.

I am grateful for the opportunity to work with Mr. Aggrey, whose expertise and mentorship have provided me with the tools and confidence needed to excel in my career. I am now better equipped to face the challenges of the IT industry and continue advancing as a software engineer.

I deeply appreciate Mr. Aggrey's dedication to my growth, and I look forward to applying the knowledge gained during this mentorship in my future career.

Acknowledgements

I would like to extend my sincere gratitude to the Kenya School of Government for providing me with the opportunity to intern and for facilitating this mentorship program. I would also like to express my thanks to Mr. Aggrey Busolo for his continuous support and guidance, which has been instrumental in my professional development.

Denis Kiplagat

Intern, Software Engineering

Kenya School of Government
